WEBSITE ADD-ON SERVICE GUIDE

Website Accessibility Monitor

Find shopping barriers before they cost you customers.

MONTHLY PRICE	STANDARD SETUP
\$39/month	\$99 one time setup
INSTALLATION	REQUEST REVIEW
Usually configured within 2 to 3 business days after the approved page list is received	Reviewed by noon Central on the next business day

A repeatable website capability installed and reviewed by LobbiCore.

What this adds to your website

We regularly check important parts of your website for problems that could make it difficult for people with disabilities to browse products, use forms, add items to their cart, or complete important actions. You receive a clear, prioritized report showing what should be reviewed or improved.

Who it is for

Ecommerce businesses that regularly add products, promotions, forms, popups, apps, or website updates and want an early warning when common accessibility concerns appear.

What is included

- Recurring automated checks for up to 25 approved pages
- Monitoring of agreed shopping and customer service paths
- Checks for common keyboard, image, form, contrast, and page structure concerns
- A prioritized monthly findings report
- Limited human review to remove obvious false alarms
- Progress tracking from one review to the next
- Alerts when significant new concerns are detected

How it helps your business

- Help more customers browse and shop successfully
- Find common barriers that can interrupt a purchase
- Catch concerns introduced by new content or website updates
- Keep accessibility improvements organized and visible

Standard setup

The \$99 setup fee covers one eligible ecommerce website, up to 25 approved pages or representative templates, a baseline automated scan, identification of agreed shopping paths, and monthly report configuration.

Website compatibility

Available for eligible ecommerce websites whose important product, cart, form, and customer service pages can be safely evaluated. Third party checkout and account areas are reviewed for testing access and technical limitations.

How the experience works

Monitor Important Shopping Paths

Approved product, search, filter, cart, form, and customer service pages are checked for common barriers that can interrupt shopping.

Catch New Concerns

Recurring checks help identify concerns introduced by new products, promotions, apps, themes, popups, and website updates.

Understand What to Fix First

The monthly report organizes findings by priority so the business can review the most important concerns before planning repairs.

Keep Human Review in the Process

Limited findings review helps remove obvious false alarms, while complete manual accessibility and legal review remain separate services.

Important to know

- This service identifies common accessibility concerns and does not guarantee legal compliance
- Automated monitoring cannot determine whether an entire website is accessible
- The included human review is limited to findings triage and removal of obvious false alarms
- A complete manual audit, assistive technology testing, usability testing with people with disabilities, legal review, and formal conformance assessment are not included
- Website repairs and content remediation are quoted separately unless already covered by another written service agreement
- Third party checkout, embedded tools, apps, and account areas may limit what can be tested or corrected
- Additional websites, more than 25 approved pages or templates, and complex authenticated shopping flows require a separate quote

How installation works

- Request a compatibility review. No payment is collected from the Marketplace page.
- Lobbicore confirms the website, scope, content, access, schedule, and final price.
- A developer installs the approved capability in a controlled test environment.
- The website owner reviews the result before release.
- Lobbicore verifies the live release and confirms ongoing support details.
